#### Learning outcome:
The aim of this complementary and noncompulsory module is to broaden and enrich the studies at the Tongji University for the German students.

*Knowledge:* To understand the interdisciplinary perspective of knowledge in urban-planning context. To learn about recent and contemporary findings in practice and theory.

*Competences:* Students are supported to reflect trained theories to their daily work and study. The lectures support the students' individual thesis research and study interests.

#### Contents:
Professors from other colleges in China or abroad will give lectures with theoretic consideration.

The topics cover the broad range of research fields of urban planning, architecture and landscape studies and landscape architecture. The topics depend on the lecturers invited and thus vary from year to year. The students choose the lectures according their own fields of interest.

#### Teaching methods:
Lecture series of invited guest professors, followed by discussions

#### Modes of assessment:
Students can acquire credits by attending 4 lectures

#### Conditions for granting credit points:
attendance of 4 lectures proven by the signature of the lecturer

#### Weight of the mark for the final score:
