**Kind of course:** lecture  
**Contact hours:** 36 hours  
**Self-study:** 114 hours  
**Number of participants:** max. 80 students

**Preconditions to participate:** none

## Learning outcome:

**Knowledge:** The students have a basic understanding of the theories of landscape studies. They have become acquainted with all kinds of contemporary theories. They know the meaningful theories in the process of landscape development and theories currently used in landscape planning and urban and regional in the world.

**Competences:** The participants train working in interdisciplinary student groups. They augment their analytical competence to evaluate multiperspective theoretical approaches. The students are introduced in practical work in different specialized fields of landscape Architecture.

## Contents:
- Theories in some selective topic will be introduced to the students.
- Landscape Studies Development Research Strategies;
- The evolution of Theories of Landscape Studies;
- Landscape Architecture and Culture Theories Research;
- Landscape Architecture and Policy Theories Research;
- Landscape Architecture Analysis and Evaluation Research;
- Landscape Architecture Theories Issues;
- Urban Landscape Designing Theories and Practices;
- Green Space System Planning Theories and Practices;

## Teaching methods:
Lectures given by professors in different research background.

## Modes of assessment:
study reports or papers, regularly attending in discussions

## Conditions for granting credit points:
written papers, attending rate in all discussions

## Weight of the mark for the final score:
The weight of the mark equals the CP of the module.

**Person in charge for the module:** Prof. Dr. Binyi Liu

**Teaching staff:**
- Prof. Dr. Yuncai Wang,
- Prof. Dr. Song Liu,
- Prof. Dr. Feng Han,
- Prof. Dr. Chenzhao Wu,
- Associate Prof. Dr. Xiangpin Zhou,
- Associate Prof. Dr. Nannan Dong,
- Associate Prof. Dr. Min Wang,
- Associate Prof. Daixin Dai,
- Dr. Yuelai Liu,
